

SILSHIELD® Decoration Film - Forested DE101

Product Introduction

Silshield® frosted glass film DE101 – designed specifically for trains. Crafted with premium materials tailored for locomotives, this film seamlessly combines durability and aesthetics. Its high-quality base and adhesive ensure enduring beauty, making your train both robust and stylish. The fog-like matte finish not only adds an elegant touch but also provides protection for your locomotive. What sets this film apart is its special feature – a translucent yet non-penetrative effect, adding a layer of mystery to your vehicle. Environmentally conscious, our film is an eco-friendly choice that combines style with sustainability. Elevate your railway experience with our specialized frosted glass film – where durability, aesthetics, a touch of mystery, and environmental responsibility effortlessly converge.

Features

Durability: Engineered with high-quality materials, the film ensures long-lasting performance, withstanding the challenges of railway environments.

Aesthetics: The fog-like matte finish adds an elegant and stylish appearance to the train, enhancing its overall aesthetic appeal.

Translucent Privacy: The film provides a translucent effect, allowing light transmission while maintaining privacy for the interior of the train.

Specialized for Locomotives: Tailored specifically for locomotives, the film takes into account the unique requirements and conditions of railway applications.

Environmental Responsibility: This eco-friendly solution reflects a commitment to environmental sustainability, making it a responsible choice for train operators.

Packaging
